

# Evidence Based Practice Training:

## Augmentative and Alternative Communication (AAC)

Adapted from Steinbrenner, J.R. et.al. (2020). Augmentative and Alternative Communication Evidence-Based Practices for Children, Youth, and Young Adults with Autism Spectrum Disorder Report, National Clearinghouse on Autism Evidence and Practice (NCAEP)

<https://ncaep.fpg.unc.edu/>

[www.captain.ca.gov](http://www.captain.ca.gov)

# What is CAPTAIN

The California Autism Professional Training And Information Network (CAPTAIN) is an interagency network developed to support the understanding and use of evidence based practices (EBPs) for individuals with Autism across the state of California.

[www.captain.ca.gov](http://www.captain.ca.gov)

# What is CAPTAIN

Marin County SELPA in partnership with CAPTAIN, are members of the Statewide System of Support as the Special Education Content Lead for Autism.

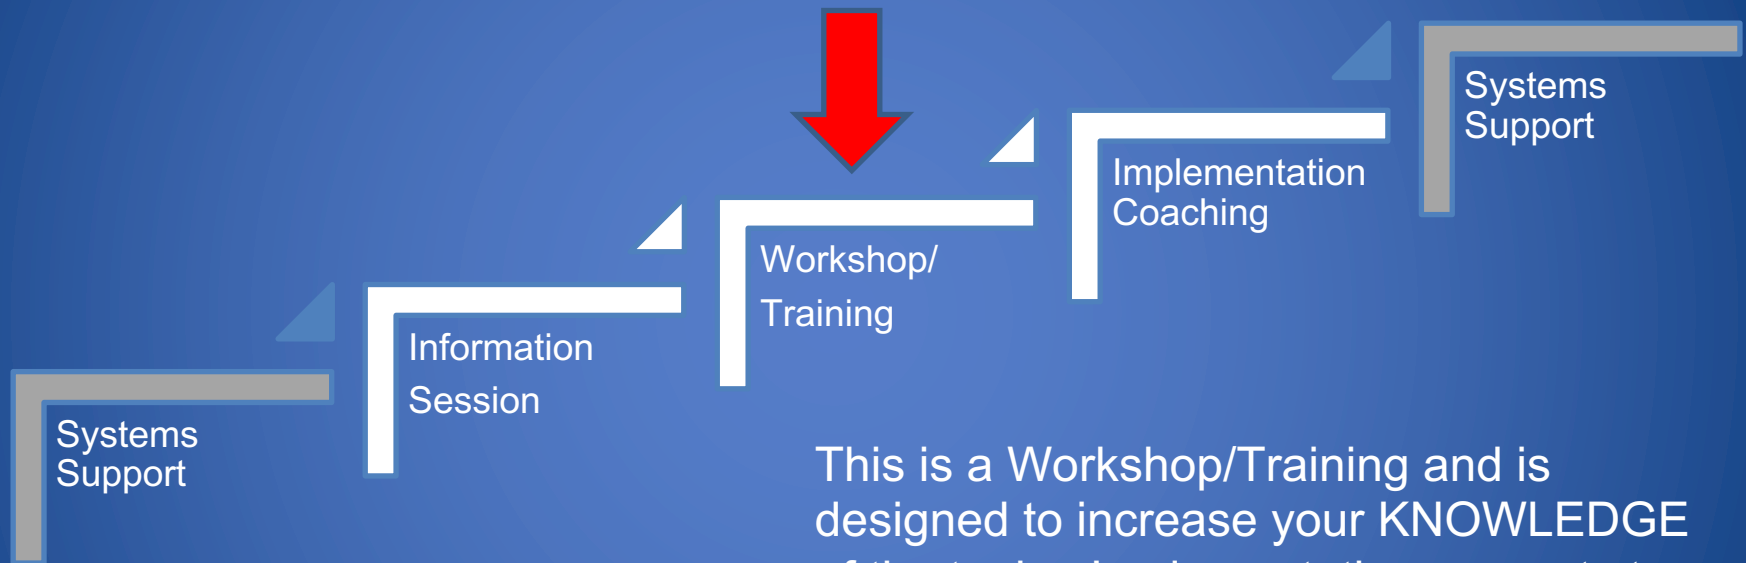

This project is funded by the California Department of Education and the California Collaborative for Educational Excellence.

[www.captain.ca.gov](http://www.captain.ca.gov)

# Levels of Professional Development to Reach Implementation

This is a Workshop/Training and is designed to increase your KNOWLEDGE of the topic. Implementation supports to assist you with use of this EBP will be outlined following the TRAINING/WORKSHOP

# Before We Begin...

Please complete the **Pre-Training Survey**  
sent to your email

# Learning Objectives

Define Evidence-Based Practices for Autism

Define Augmentative and Alternative Communication  
(The Basics)

Describe how to develop a plan for using AAC

Describe how to successfully implement AAC in your  
instructional setting.

# What are Evidence Based Practices?

NCAEP definition of an EBP:

“Focused intervention practices that have evidence of efficacy in promoting positive outcomes for learners with ASD.”

Steinbrenner, J. R., Hume, K., Odom, S. L., Morin, K. L., Nowell, S. W., Tomaszewski, B., Szendrey, S., McIntyre, N. S., Yücesoy-Özkan, S., & Savage, M. N. (2020). Evidence-based practices for children, youth, and young adults with Autism. The University of North Carolina at Chapel Hill, Frank Porter Graham Child Development Institute, National Clearinghouse on Autism Evidence and Practice Review Team.

# Evidence Based Practice Matrix (28 EBPs)

Table 3.7 Matrix of evidence-based practices, outcomes, and age categories

Evidence-Based Practices See Table 3.1 to link abbreviations to EBPs	Academic/ Pre-academic			Adaptive/ Self-help			Challenging/ Interfering behavior			Cognitive			Communi- cation			Joint attention			Mental health			Motor			Play			School readiness			Self- determination			Social			Vocational

# Selecting EBPs

Before beginning a new practice with a learner, it is important to follow four planning steps

1. Identify the behavior
2. Collect baseline data on the behavior
3. Establish an observable and measurable goal
4. Choose an EBP
  - Consider the child and family characteristics
  - Consider the teacher and team characteristics
  - Consider other available resources

# Selecting an EBP Checklist

Autism Focused Intervention Resources & Modules **Selecting an EBP Checklist**  
 For more information, please visit: <https://afirm.fpg.unc.edu/>

**---Selecting an EBP Checklist---**

Learner's Name: \_\_\_\_\_ Date/Time: \_\_\_\_\_  
 Observer(s): \_\_\_\_\_  
 Target Goal/Behavior/Skill (short): \_\_\_\_\_  
 Directions: Complete this checklist to select an appropriate practice to use with the learner with ASD.

**IDENTIFY TARGET GOAL/BEHAVIOR/SKILL:**

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

**COLLECT BASELINE DATA (OR USE SELECTING AN EBP DATA COLLECTION SHEET):**

## Introduction to Autism Spectrum Disorder

### Introduction to ASD

Hide description

Autism spectrum disorder (ASD) is a lifelong developmental disability that primarily affects communication.

**Time to complete:**

This module will take approximately 2 - 3 hours to complete.

## Available EBP Modules

ABI

### Antecedent-based Intervention

Hide description

Antecedent-based interventions can be used to decrease an identified interfering behavior and increase engagement by modifying the environment.

**Time to complete:**

This module will take approximately 1.5 - 2 hours to complete.

AAC

### Augmentative & Alternative Communication

Hide description

Augmentative and alternative communication (AAC) can be used to increase student communication, socialization, and engagement while reducing interfering behaviors.

**Time to complete:**

This module will take approximately 1.5 - 2 hours to complete.

ASI

### Ayres Sensory Integration

Hide description

Ayres Sensory Integration® (ASI) can be used to increase learner communication, socialization, cognitive, and adaptive skills while reducing challenging behaviors in learners with identified challenges in sensory processing.

**Time to complete:**

This module will take approximately 1.5 - 2 hours to complete.

# Communication

- is a critical foundational skill
- impacts independence, academics and social success
- is a fundamental human skill
- is a right every student has
- ensures that all students have an effective way to communicate their needs
- reduces interfering behavior in the classroom and at home

# Expressive Communication

Expressive Communication is defined as “one’s ability to communicate thoughts and feelings through words, gestures, or facial expressions.”

# Who is a candidate for AAC?

- Anyone who is not able to communicate effectively with speech alone
- Anyone who is partially able to communicate with speech but may not be understood by others
- Anyone who has adequate speech but needs supports for writing or extending conversations

# What goals can be addressed through AAC?

## Increase Communication (examples)

- Requesting (desired objects/activities)
- Protesting (undesired objects/activities/action by someone else)
- Commenting (about activities and events of interest)

[www.captain.ca.gov](http://www.captain.ca.gov)

# What goals can be addressed through AAC? (continued)

## Increase Social Participation and Engagement (examples)

- Greetings teachers and peers
- Requesting a turn
- Taking a turn
- Asking for materials from a peer

[www.captain.ca.gov](http://www.captain.ca.gov)

# What goals can be addressed through AAC? (continued)

## Increase engagement in academic/pre-academic tasks (examples)

- Requesting more of an activity
- Answering a question
- Asking for clarification
- Participating in classroom routines

[www.captain.ca.gov](http://www.captain.ca.gov)

# What goals can be addressed through AAC?

## Increase Play Skills (examples)

- Using symbolic play skills

## Increase Vocabulary acquisition (examples)

- Applying core academic vocabulary during class activities
- Learning new concepts/vocabulary during book reading activities
- Practicing social vocabulary in settings like recess group work and lunch

## Reduce Interfering Behaviors (examples)

- Express feelings without interfering behaviors
- Requesting a break

# How does AAC help learners?

- Uses Visual Supports
- Reduces social pressure
- Serves as a communication model for children who are developing speech
- Motivates learners to communicate
- Increases social interaction with peers

# Where can AAC Training Be Implemented?

## SCHOOL

playground  
cafeteria  
classroom centers  
bathroom  
bus  
passing period

## HOME

cooking  
chores  
bathroom routines  
bedroom routines  
homework routines

## COMMUNITY

stores  
public bathrooms  
work environment  
public transportation  
restaurants  
library

# Who can Implement AAC Training ?

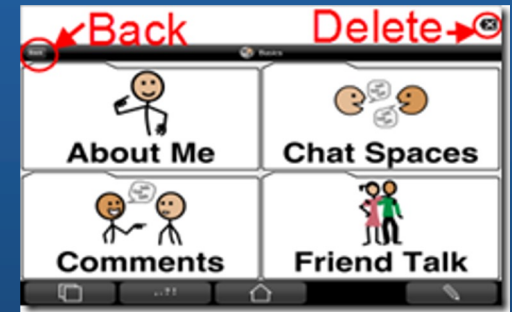

This practice can be used by a variety of professionals, including teachers, special educators, therapists, paraprofessionals, and early interventionists in educational and community-based environments. Parents and family members also can use this practice in the home.

Modeling

# Picture Exchange Communication System ®

The 2020 NCAEP report reclassified **PECS®** as a Manualized Intervention Meeting Criteria (MIMCs)

A MIMC is operationally defined as interventions that a) are manualized, b) have unique features that create an intervention identity, and c) share common features with other practices grouped within the superordinate EBP classification

Instead of **PECS®** remaining a stand alone EBP, it was grouped into the AAC EBP as a MIMC

**PECS®** is an AAC system developed in 1985 by Andy Bondy, PhD, and Lori Frost, MS, CCC-SLP.

# What is PECS®?

<https://pecsusa.com/pecs>

“The **PECS**® teaching protocol is based on B.F. Skinner’s book, Verbal Behavior, and broad spectrum applied behavior analysis.

Specific prompting and reinforcement strategies that will lead to independent communication are used throughout the protocol.

The protocol also includes systematic error correction procedures to promote learning if an error occurs. Verbal prompts are not used, thus building immediate initiation and avoiding prompt dependency.

**PECS**® consists of six phases and begins by teaching an individual to give a single picture of a desired item or action to a “communicative partner” who immediately honors the exchange as a request. The system goes on to teach discrimination of pictures and how to put them together in sentences. In the more advanced phases, individuals are taught to use modifiers, answer questions and comment.

The primary goal of **PECS**® is to teach functional communication.

Research has shown that some learners using **PECS**® also develop speech. Others may transition to a speech generating device (SGD).”

# PICTURE EXCHANGE COMMUNICATION SYSTEM ®

# How to learn more about PECS®

- **Get trained!**

The AFIRM Implementation Checklist states as the first step: *“Receive PECS training from a certified PECS trainer”*

<https://pecsusa.com/pecs/>

- **Review the AFIRM online training module:**

<https://afirm.fpg.unc.edu/picture-exchange-communication-system>

Picture Exchange Communication System (PECS)  
—Implementation Checklist—

		Observation Date			
		1	2	3	4
		Observer's Initials			
<p><i>Before you start:</i></p> <p><i>Have you...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Identified the behavior?</li> <li><input type="checkbox"/> Collected baseline data through direct observation?</li> <li><input type="checkbox"/> Established a goal or outcome that clearly states when the behavior will occur, what the target skill is, and how the team will know when the skill is mastered.</li> </ul> <p><i>If the answer to any of these "no", refer to the "Selecting EBPs" section on the website.</i></p>	<b>Step 1: Planning</b>				
	1.1 Receive PECS training from a certified PECS trainer				
	1.2 Identify adults who will participate in PECS and train as needed				
	1.3 Conduct a needs/assessment				
	1.4 Conduct assessments				
	1.5 Prepare communication pictures/symbols and books				
	<b>Step 2: Using</b>				
	2.1 Implement Phase 1: Teaching the physically assisted exchange				
	<input type="checkbox"/> Arrange the training environment				
	<input type="checkbox"/> Helper physically prompts the learner's communicative exchange with communicative partner				
	<input type="checkbox"/> Reward learner with reinforcer				
	<input type="checkbox"/> Use physical assistance and open-hand prompt				
	<input type="checkbox"/> Determine if learner meets basic skills of Phase 1 to move to Phase 2				
	2.2 Implement Phase 2: Expanding spontaneity				
	<input type="checkbox"/> Increase number and variety of reinforcers				
<input type="checkbox"/> Increase number of communicative partners					
<input type="checkbox"/> Conduct training in a variety of environments					
<input type="checkbox"/> Encourage learner to seek communication book through traveling activities					
<input type="checkbox"/> Determine if learner meets skills of Phase 2 to move to Phase 3					
2.3 Implement Phase 3: Simultaneous discrimination of pictures					
<input type="checkbox"/> Reinforce selection of correct picture to teach discrimination between two pictures					
<input type="checkbox"/> Teach discrimination through correction procedure					
<input type="checkbox"/> Increase number of pictures in display					
<input type="checkbox"/> Conduct correspondence checks					
<input type="checkbox"/> Determine if learner meets skills of Phase 3 to move to Phase 4					
2.4 Implement Phase 4: Building sentence structure					
<input type="checkbox"/> Introduce sentence structure to learner					
<input type="checkbox"/> Promote verbalization					
<input type="checkbox"/> Determine if learner meets skills of Phase 4 to move to Phase 5					
2.5 Implement Phase 5: Responding to "What do you want?"					
<input type="checkbox"/> Introduce the question, "What do you want?" using a zero-second delay					
<input type="checkbox"/> Increase delay interval for the prompt					
<input type="checkbox"/> Determine if learner meets skills of Phase 5 to move to Phase 6					
2.6 Implement Phase 6: Commenting in response to a question					
<input type="checkbox"/> Prepare needed materials					
<input type="checkbox"/> Introduce commenting in response to a question					
<input type="checkbox"/> Teach differentiated responses to questions					
<input type="checkbox"/> Teach spontaneous commenting					
<input type="checkbox"/> Determine if learner meets skills of Phase 6					
<b>Step 3: Monitoring</b>					
3.1 Collect data on target behaviors/skills					
3.2 Determine next steps based on learner progress					

AFIRM Action Focused Implementation Review and Modules

## ---Implementation Checklist---

		Observation:	1	2	3	4	5	
		Date:						
		Observer's initials:						
		<b>STEP 1: PLANNING</b>						
<p><b>Before you start, have you...?</b></p> <p><input type="checkbox"/> Identified the target goal/behavior/skill...?</p> <p><input type="checkbox"/> Collected baseline data through direct observation...?</p> <p><input type="checkbox"/> Established a target goal or outcome that clearly states when the behavior will occur, what the target goal or outcome is, and how team members and/or observers will know when the skill is mastered...?</p> <p><b>If the answer to any of the above questions is 'No,' review the process of how to select an EBP .</b></p>	1.1	Determine if an AAC assessment may be appropriate for a learner						
	1.2	Conduct an AAC assessment						
	1.3	Discuss technology and AAC preferences with family and learner						
	1.4	Identify available AAC resources						
	1.5	Select additional EBPs for teaching use of the AAC system						
	1.6	Plan opportunities for the learner to use AAC						
	1.7	Identify and train team members						
	1.8	Prepare and have materials ready and available						
			<b>STEP 2: USING</b>					
	2.1	Teach learner to use AAC device						
	2.2	Understand formalized AAC teaching approaches						
	2.3	Give reinforcement						
	2.4	Ensure consistent use of AAC across settings						
			<b>STEP 3: MONITORING</b>					
	3.1	Collect and analyze data						
	3.2	Monitor use of AAC across settings						
	3.3	Troubleshoot issues (if needed)						
	3.4	Determine next steps based on learner progress						

# AAC Implementation Checklist

# Planning AAC

- Determine if an AAC Assessment is appropriate for the learner
- Conduct an AAC Assessment
- Discuss technology and AAC preferences with family and learner
- Identify available AAC resources
- Select additional EBPs for teaching use of the AAC system
- Plan opportunities for the learner to use AAC (tools such as an activity Matrix, activity specific core boards)
- Identify and train team members
- Prepare and have materials ready and available

# Determine if an AAC Assessment Might Be Appropriate for a Learner

**IEP TEAM  
IDENTIFIES A  
POTENTIAL  
NEED**

**Conduct an AAC assessment**

# ---Assessment Checklist Worksheet---

AAC

Learner's Name: \_\_\_\_\_ Date/Time: \_\_\_\_\_

Observer(s): \_\_\_\_\_

Target Goal/Behavior/Skill (short): \_\_\_\_\_

Directions: Complete this worksheet to determine if an assessment for AAC is needed

AAC SPECIFIC PLANNING:		
1. Is the learner making little progress toward communication goals during academic or social parts of the school day?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
2. Is the learner showing frustration or other negative behaviors when there are communication demands placed on them during the school day?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
3. Do the learner's teachers, family, and/or peers have a hard time understanding the learner's current communication or spoken language?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
4. Does the learner seem interested in participating in activities or communicating with others but lack the language to do so effectively?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
5. Does the learner show little engagement in daily activities or seem withdrawn?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
6. Has the learner's family mentioned communication concerns or the desire for the student to have more effective communication?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
7. Does the learner seem to have matured beyond their current AAC system?	<input type="checkbox"/> Yes	<input type="checkbox"/> No

If you answered yes to any of these questions, then the learner may need a more thorough assessment with your school speech-language pathologist or assistive technology specialist.

**ANECDOTAL NOTES:**

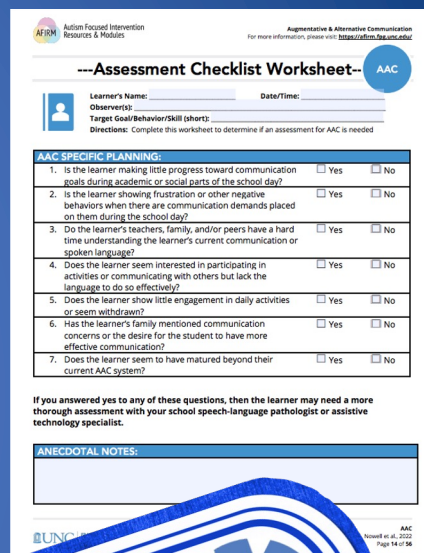

# Break out Room Activity

In your break out room have one person think of a student they are currently working with.

Using the [Assessment Checklist Worksheet](#), go around the room and have each person in your group ask a question on this sheet in order to familiarize your group with the student.

Ask probing questions if needed to be able to come to a conclusion at the bottom of the page.

Repeat with another group member answer the questions about their identified student.

The image shows a worksheet titled "Assessment Checklist Worksheet" for AAC (Augmentative & Alternative Communication). It includes fields for Learner's Name, Observer's Name, and Date/Time. The main section is "AAC SPECIFIC PLANNING" with seven numbered questions, each with Yes/No checkboxes. Below the questions is a section for "ANECDOTAL NOTES" and a footer with the URL "www.captain.ca.gov".

AAC SPECIFIC PLANNING	
1. Is the learner making little progress toward communication goals during academic or social parts of the school day?	<input type="checkbox"/> Yes <input type="checkbox"/> No
2. Is the learner showing frustration or other negative behaviors when there are communication demands placed on them during the school day?	<input type="checkbox"/> Yes <input type="checkbox"/> No
3. Do the learner's teachers, family, and/or peers have a hard time understanding the learner's current communication or spoken language?	<input type="checkbox"/> Yes <input type="checkbox"/> No
4. Does the learner seem interested in participating in activities or communicating with others but lack the language to do so effectively?	<input type="checkbox"/> Yes <input type="checkbox"/> No
5. Does the learner show little engagement in daily activities or seem withdrawn?	<input type="checkbox"/> Yes <input type="checkbox"/> No
6. Has the learner's family mentioned communication concerns or the desire for the student to have more effective communication?	<input type="checkbox"/> Yes <input type="checkbox"/> No
7. Does the learner seem to have matured beyond their current AAC system?	<input type="checkbox"/> Yes <input type="checkbox"/> No

If you answered yes to any of these questions, then the learner may need a more thorough assessment with your school speech-language pathologist or assistive technology specialist.

ANECDOTAL NOTES:

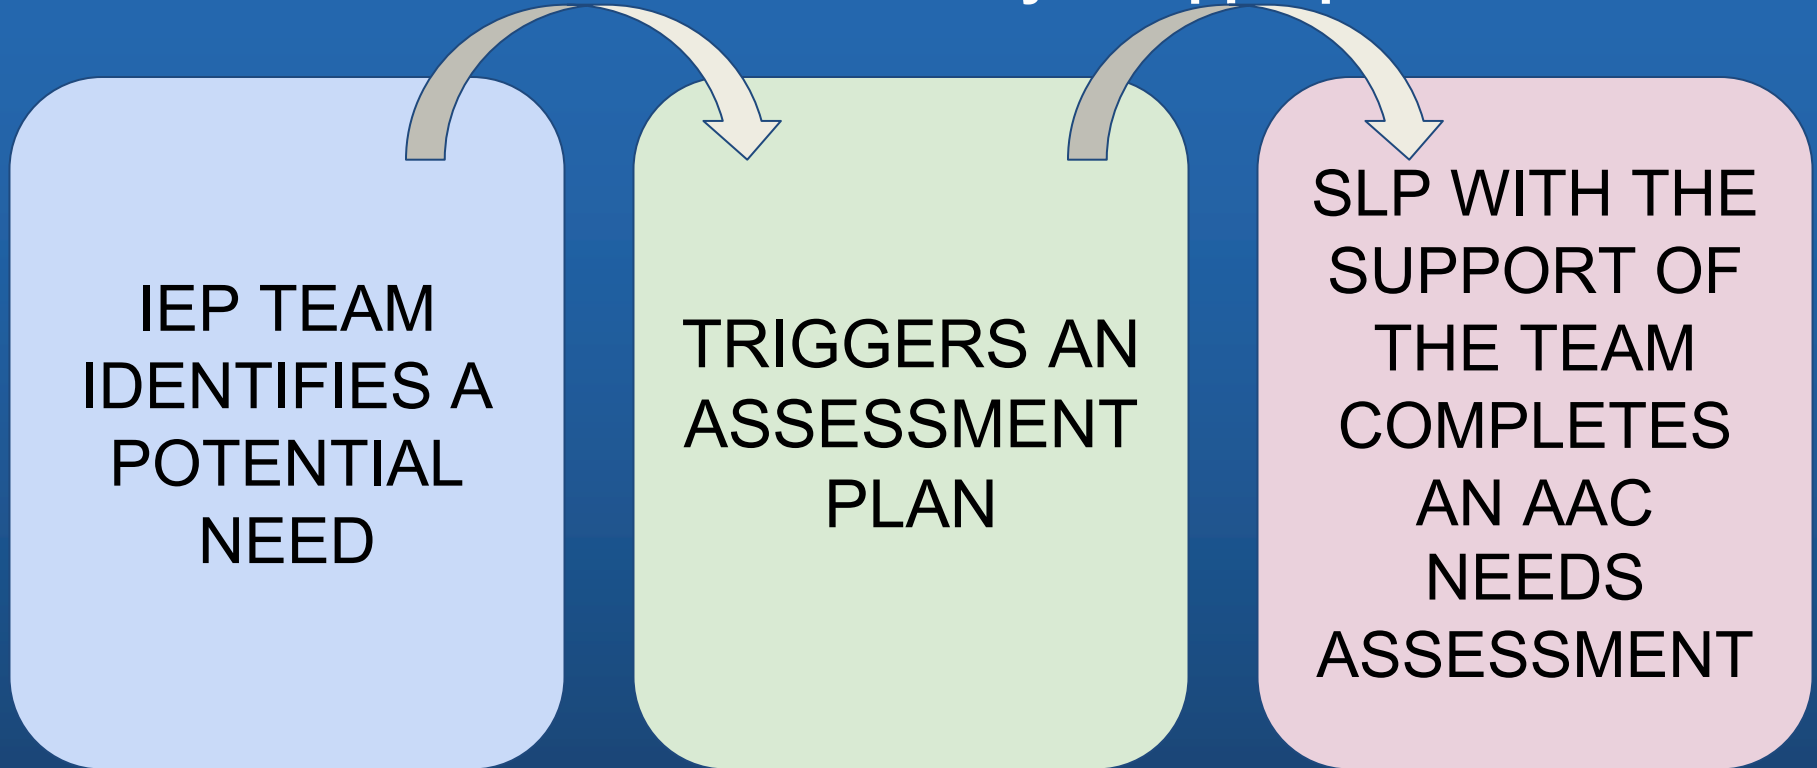

www.captain.ca.gov

# Planning for AAC: Assessing the Need

Determine if an AAC assessment may be appropriate for a learner.

Conduct an AAC assessment

# Conducting an AAC Assessment

## Who makes up the TEAM?

AAC Training should only be implemented after a formal AAC Assessment has been completed by a team of qualified professionals.

- SLP
- General Education/Special Education Teacher(s)
- Family
- OT, PT, VI, OI specialists (as needed)

***The speech-language pathologist should be the primary voice in helping the team to complete the assessment, and to develop a plan and supervise the implementation of AAC.***

# Identify Available AAC Resources

Funding Resources to Consider if IEP Identifies a need for high tech equipment/device:

- School District Resources
- Low Incidence Funding if the student qualifies (Severe Orthopedic Impairment, Visual Impairment, Deaf-Hard of Hearing, Deaf-Blind, or any combination of these)

# Select Additional EBPs for Teaching Use of the AAC System

## Using other EBPs

Peer-Based Instruction and Intervention  
Reinforcement  
Prompting/Time Delay  
Visual Supports  
Modeling

## EBP

## Description

Reinforcement

Plan how to reward/motivate AAC use in all contexts by creating a reinforcement schedule.

Prompting

Establish a hierarchy of least-to-most restrictive prompts to use the AAC system.

Visual Supports,  
Peer-Based  
Instruction, Video  
Modeling, Time  
Delay, Modeling

These other EBPs also support teaching of AAC please refer to AFIRM module for more details.

## ---R+ Checklist & Sampling---

Learner's Name: \_\_\_\_\_ Date/Time: \_\_\_\_\_  
 Observer(s): \_\_\_\_\_  
 Target Goal/Behavior/Skill: \_\_\_\_\_  
 Directions: Use this checklist to select reinforcers/rewards based on the learner's preferred items, interests, and activities.

### CONDUCT A REINFORCER SAMPLING:

1. Sit in front of the learner and hold up two items.
2. Wait 10 seconds for the learner to indicate selection (e.g., verbalization, pointing, using an AAC system).
3. Place the selected object in a container for the learner. If the learner does not select an object, place the object in a container for the learner.
4. Repeat steps 1 through 3 until half of the objects have been sampled.

Item 1	Selection
	<input type="checkbox"/> Yes <input type="checkbox"/> No
	<input type="checkbox"/> Yes <input type="checkbox"/> No
	<input type="checkbox"/> Yes <input type="checkbox"/> No
	<input type="checkbox"/> Yes <input type="checkbox"/> No
	<input type="checkbox"/> Yes <input type="checkbox"/> No
	<input type="checkbox"/> Yes <input type="checkbox"/> No
	<input type="checkbox"/> Yes <input type="checkbox"/> No

List:

---

---

---

---

## ---Prompting Hierarchy---

Learner's Name: \_\_\_\_\_ Date/Time: \_\_\_\_\_  
 Observer(s): \_\_\_\_\_  
 Target Goal/Behavior/Skill: \_\_\_\_\_  
 Directions: Use this checklist to determine order of prompts based on the learner's needs and the target skill.

### PROMPTS:

- **Gestural** – a physical movement that provides the learner with information about how to perform the target skill/behavior
- **Independent** – the learner is able to perform the target skill/behavior without assistance or support from others
- **Model** – demonstrating the correct way to perform the target skill/behavior for the learner
- **Physical** – hands-on assistance given to the learner to support them to perform the target skill/behavior
- **Verbal** – any spoken words direct to the learner to help them perform the target skill/behavior
- **Visual** – a picture, icon, or physical object used to provide the learner with information on how to perform the target skill/behavior

### DETERMINE PROMPT ORDER:

Level	Prompt	Instructions
Level 1	Independent	
Level 2		
Level 3		
Level 4		
Level 5		
Level 6		

Select additional EBPs for teaching use of the AAC system

# Plan Opportunities for the Learner to Use AAC

Consider Goals the IEP team has developed for use with a student and determine when these goals can be addressed within naturally occurring routines and activities. Link Goals to Communicative Function.

Tools:  
Communicative Goals Plan  
Activity Matrix  
Activity Specific Core Boards

 Autism Focused Intervention Resources & Modules

Augmentative & Alternative Communication  
For more information, please visit: <https://afirm.fgusd.edu>

**---Communicative Goals Plan---** 

Learner's Name: \_\_\_\_\_ Date/Time: \_\_\_\_\_  
Observer(s): \_\_\_\_\_  
Target Goal/Behavior/Skill: \_\_\_\_\_  
Directions: Identify communicative goals for the learner and plan for which setting(s) and communication partner the learner will work on these goals in/with.

**IDENTIFY TIMES TO USE AAC SYSTEM:**

Communicative Goal/Function	Setting/Activity	Communication Partner
		<input type="checkbox"/> Teacher <input type="checkbox"/> Para <input type="checkbox"/> Peer <input type="checkbox"/> Other: _____
		<input type="checkbox"/> Teacher <input type="checkbox"/> Para <input type="checkbox"/> Peer <input type="checkbox"/> Other: _____
		<input type="checkbox"/> Teacher <input type="checkbox"/> Para <input type="checkbox"/> Peer <input type="checkbox"/> Other: _____
		<input type="checkbox"/> Teacher <input type="checkbox"/> Para <input type="checkbox"/> Peer <input type="checkbox"/> Other: _____
		<input type="checkbox"/> Teacher <input type="checkbox"/> Para <input type="checkbox"/> Peer <input type="checkbox"/> Other: _____
		<input type="checkbox"/> Teacher <input type="checkbox"/> Para <input type="checkbox"/> Peer <input type="checkbox"/> Other: _____

# So Many Reasons to Communicate!

# Plan Opportunities for the Learner to Use AAC: Communicative Functions

[www.captain.ca.gov](http://www.captain.ca.gov)

# Identify and Train Team Members

Discuss technology and AAC preferences with family and learner

Recommendation: Speech-Language Therapist and AAC Specialist take the lead on training other team members

1. Include regular communication partners:  
Classroom teacher, parents,  
paraprofessional and the learner.

1. Later: train peers

# Identify and Train Team Members

American - Speech, Language and Hearing Association (ASHA) has developed guidelines for training team members in the use of AAC.

It is recommended that any SLP or AAC Specialist who is involved in training others refer to these guidelines for details.

(Reference the AFIRM module or [www.asha.org](http://www.asha.org))

# Break out Room Activity With Feedback

Using three goals your group develops for a specific child who uses AAC, complete the [Communicative Goals Plan worksheet](#).

Remember the same goal can be indicated on multiple lines of your planning sheet.

AFIRM Autism Focused Intervention Resources & Modules Augmentative & Alternative Communication for more information, please visit: <http://afirm.fgacs.edu/>

**---Communicative Goals Plan---** AAC

Learner's Name: \_\_\_\_\_ Date/Time: \_\_\_\_\_

Observer(s): \_\_\_\_\_

Target Goal(s)/Behavior(s): \_\_\_\_\_

Directions: Identify communicative goals for the learner and plan for which setting(s) and communication partner the learner will work on these goals in/with.

**IDENTIFY TIMES TO USE AAC SYSTEM:**

Communicative Goal/Function	Setting/Activity	Communication Partner
		<input type="checkbox"/> Teacher <input type="checkbox"/> Para <input type="checkbox"/> Peer <input type="checkbox"/> Other:
		<input type="checkbox"/> Teacher <input type="checkbox"/> Para <input type="checkbox"/> Peer <input type="checkbox"/> Other:
		<input type="checkbox"/> Teacher <input type="checkbox"/> Para <input type="checkbox"/> Peer <input type="checkbox"/> Other:

---Implementation Checklist---

# AAC Implementation Checklist

		Observation:	1	2	3	4	5
		Date:					
		Observer's initials:					
		<b>STEP 1: PLANNING</b>					
<p><b>Before you start, have you...?</b></p> <p><input type="checkbox"/> Identified the target goal/behavior/skill...?</p> <p><input type="checkbox"/> Collected baseline data through direct observation...?</p> <p><input type="checkbox"/> Established a target goal or outcome that clearly states when the behavior will occur, what the target goal or outcome is, and how team members and/or observers will know when the skill is mastered...?</p> <p><b>If the answer to any of the above questions is 'No,' review the process of how to select an EBP .</b></p>	1.1	Determine if an AAC assessment may be appropriate for a learner					
	1.2	Conduct an AAC assessment					
	1.3	Discuss technology and AAC preferences with family and learner					
	1.4	Identify available AAC resources					
	1.5	Select additional EBPs for teaching use of the AAC system					
	1.6	Plan opportunities for the learner to use AAC					
	1.7	Identify and train team members					
	1.8	Prepare and have materials ready and available					
			<b>STEP 2: USING</b>				
	2.1	Teach learner to use AAC device					
	2.2	Understand formalized AAC teaching approaches					
	2.3	Give reinforcement					
	2.4	Ensure consistent use of AAC across settings					
		<b>STEP 3: MONITORING</b>					
	3.1	Collect and analyze data					
	3.2	Monitor use of AAC across settings					
	3.3	Troubleshoot issues (if needed)					
	3.4	Determine next steps based on learner progress					

# Using/Implementing AAC

- Teach learner to use AAC device
- Implement formalized AAC teaching approaches
- Give reinforcement
- Ensure consistent use of AAC across settings

# Teach Learner To Use AAC Device

SLPs or AT specialists will lead the team in determining strategies to support the learner.

Recall the following from your planning steps:

- the settings
- communication partners
- communication goals by function
- EBPs

# Understand Formalized AAC Teaching Approaches

## Teaching Approaches:

- Aided Language Modeling
- Core Vocabulary Approach
- EBPs: Prompting, Modeling, Reinforcement, Functional Communication Training
- Total Communication

Teaching Approaches might be specific to a system:

### DISCLAIMER:

Note that some of these approaches are not recognized evidence-based practices but are commonly used and may have some research evidence to support them. The descriptions are only to familiarize you with common AAC teaching approaches, they are not endorsed by AFIRM or the American Speech-Language Hearing Association (ASHA).

Dad modeled language using Josie's device every chance he could!

We

# Give Reinforcement

Some communication goals, utilizing AAC have more natural reinforcers (example: making choices or requesting objects that are highly desired).

When the task is not as intrinsically motivating during less preferred activities, you may need to be provide a more formal or structured schedule of reinforcement utilizing external motivators.

# Give Reinforcement

## Basic Elements of Reinforcement:

- Be consistent with the schedule of Reinforcement.
- Remind the student of what they are working for before starting the task.
- Provide reinforcement immediately after completing the target skill.
- Vary the types of reinforcement used (high fives, social praise, stickers, access to preferred activity or object)

Refer to AFIRM Reinforcement Module, AFIRM for Paras

# Ensure Consistent Use of AAC Across Settings

## Suggestions for School:

- Make sure device/system is portable
- Coordinate with other staff the important details of transporting the device, prompting that is necessary for device usage, and maintenance that may be required
- Device/system should not be withheld from the learn even if it is perceived as being misused
- Consider how the device will be transported home (backpack, held by student, bus communication)

# Ensure Consistent Use of AAC Across Settings

## Suggestions for Collaboration with Family:

- Consider how the device will be transported home  
(backpack, held by student, bus communication)
- Inform the family about proper care and storage of the device/system at home

## ---Implementation Checklist---

		Observation:	1	2	3	4	5	
		Date:						
		Observer's initials:						
		<b>STEP 1: PLANNING</b>						
<p><b>Before you start, have you...?</b></p> <p><input type="checkbox"/> Identified the target goal/behavior/skill...?</p> <p><input type="checkbox"/> Collected baseline data through direct observation...?</p> <p><input type="checkbox"/> Established a target goal or outcome that clearly states when the behavior will occur, what the target goal or outcome is, and how team members and/or observers will know when the skill is mastered...?</p> <p><b>If the answer to any of the above questions is 'No,' review the process of how to select an EBP .</b></p>	1.1	Determine if an AAC assessment may be appropriate for a learner						
	1.2	Conduct an AAC assessment						
	1.3	Discuss technology and AAC preferences with family and learner						
	1.4	Identify available AAC resources						
	1.5	Select additional EBPs for teaching use of the AAC system						
	1.6	Plan opportunities for the learner to use AAC						
	1.7	Identify and train team members						
	1.8	Prepare and have materials ready and available						
			<b>STEP 2: USING</b>					
	2.1	Teach learner to use AAC device						
	2.2	Understand formalized AAC teaching approaches

	3.1	Collect and analyze data						
	3.2	Monitor use of AAC across settings						
	3.3	Troubleshoot issues (if needed)						
	3.4	Determine next steps based on learner progress						

# AAC Implementation Checklist

# Monitoring the Implementation of AAC

- Collect and analyze data
- Monitor use of AAC across settings
- Troubleshoot Issues if needed
- Determine next steps based on learner progress

# Collect and Analyze Data

## Important Things To Monitor:

- Number of opportunities to communicate;
- Who the communication partners are (i.e., peers, adults, family members);
- Level of support needed to use the communication system/device (prompts needed, time required etc.)

Autism Focused Intervention  
Resources & Modules

Augmentative & Alternative Communication

### ---Data Collection: Frequency---

AAC

**Learner's Name:** \_\_\_\_\_ **Date/Time:** \_\_\_\_\_

**Observer(s):** \_\_\_\_\_

**Target Goal/Behavior/Skill:** \_\_\_\_\_

**Directions:** Collect data on the frequency of the learner demonstrating the target goal/behavior/skill to determine if the learner is making progress.

**MONITORING DATA:**

Activity	Communication Partner	Comment Opportunities (Tally each opportunity)	Support/Prompts Needed
	<input type="checkbox"/> Teacher <input type="checkbox"/> Peer <input type="checkbox"/> Para <input type="checkbox"/> Other: _____		
	<input type="checkbox"/> Teacher <input type="checkbox"/> Peer <input type="checkbox"/> Para <input type="checkbox"/> Other: _____		
	<input type="checkbox"/> Teacher <input type="checkbox"/> Peer <input type="checkbox"/> Para <input type="checkbox"/> Other: _____		
	<input type="checkbox"/> Teacher <input type="checkbox"/> Peer <input type="checkbox"/> Para <input type="checkbox"/> Other: _____		
	<input type="checkbox"/> Teacher <input type="checkbox"/> Peer <input type="checkbox"/> Para <input type="checkbox"/> Other: _____		

**Prompt Key:** V = Verbal; G = Gestural; M = Model; P = Physical; I = No prompts needed/Independent

**ANECDOTAL NOTES:**

FRANK PORTER GRAHAM  
CHILD DEVELOPMENT INSTITUTE

The National Professional Development Center  
Autism Spectrum Disorder

**AAC**  
Nowell et al., 2022  
Page 29 of 56

# Monitor Use Of AAC Across Settings

- Collect data from a variety of communication partners: family, peers, teachers, community members and the student
- Gather data from emails, texts, sticky notes on the communication system/device, photographs/videos
- Schedule phone calls or zoom meetings for regular check-ins.

 Autism Focused Intervention Resources & Modules

Augmentative & Alternative Communication  
For more information, please visit: <https://afirm.fpg.unc.edu/>

**---Data Collection: Across Settings---** 

Learner's Name: \_\_\_\_\_ Date/Time: \_\_\_\_\_  
Observer(s): \_\_\_\_\_  
Target Goal/Behavior/Skill: \_\_\_\_\_  
Directions: Collect data on the use of the AAC device across settings.

**MONITORING DATA:**

Setting	AAC Used?	Notes
	<input type="checkbox"/> Yes <input type="checkbox"/> No	
	<input type="checkbox"/> Yes <input type="checkbox"/> No	
	<input type="checkbox"/> Yes <input type="checkbox"/> No	
	<input type="checkbox"/> Yes <input type="checkbox"/> No	
	<input type="checkbox"/> Yes <input type="checkbox"/> No	
	<input type="checkbox"/> Yes <input type="checkbox"/> No	
	<input type="checkbox"/> Yes <input type="checkbox"/> No	
	<input type="checkbox"/> Yes <input type="checkbox"/> No	

 FRANK PORTER GRAHAM CHILD DEVELOPMENT INSTITUTE

 The National Professional Development Center on Autism Spectrum Disorder

AAC  
Nowell et al., 2022  
Page 30 of 56

# Troubleshoot Issues If Needed

- Data gathered will help guide changes that need to be made to learner's communication system
  - increasing communication demands in specific settings
  - increasing vocabulary
  - increasing pages or levels on a system
  - increasing communication partners
  - increasing communication functions

## ---Troubleshooting Guide---

AAC

Learner's Name: \_\_\_\_\_ Date/Time: \_\_\_\_\_  
Observer(s): \_\_\_\_\_  
Target Goal/Behavior/Skill (short): \_\_\_\_\_  
Directions: Use this guide to address issues with the learner using AAC.

### Learner is only communicating when prompted

- Use time delay to reduce prompt reliance.
- Interpret the learner's nonverbal communication and use modeling to demonstrate use of the device. For example, teacher says, "I see you reaching. You want that. Here's how you can tell me." This method teaches the learner the power of their communication.
- Model symbolic representations throughout the school day to increase receptive understanding. For example, the teacher may model bead patterns during math and say which beads are the same/different as the one before while pointing to the words on the learner's device to make this abstract concept symbolically represented.

### Learner is only communicating in one context

- Think of what is so motivating in that context and see if it can transfer to another setting.
- Increase use of reinforcement for communicating in other settings.
- Check in with teachers in other contexts to make sure they are using and reinforcing AAC.

### Learner is only communicating with adults

- Train peers to prompt and reinforce the student for communicating.

### Learner is refusing to use their device

- Reduce the number of word choices displayed. Simplify the demands placed on the student.
- Use motivating reinforcers.
- Monitor other reasons why the student may resist the device - think about sensory components like how heavy it is, what sounds it makes, etc.

### Communication device is not working

- Make sure the device is charged and all software is updated.
- Power down the device for a few minutes and try again.
- Call the tech support specialist for the device or the local device representative.

### Learner is using the device for purposes other than communication

- Use reinforcement or other EBPs to promote appropriate use of the device for communicating.

# Troubleshoot Issues If Needed

# Determine next steps based on learner progress

# Implementation Fidelity is Critical

What does this mean?

“Implementing an intervention in the same manner in which it was done in the evidence based research”

# Implementation Fidelity is Critical!

## How implementation fidelity achieved:

1. Use Implementation Checklists for the EBP to capture fidelity of implementation
2. Refer to NCAEP EBP Fact Sheets
3. Use AFIRM self-learning modules on EBPs
4. Attend training on the EBPs
5. Access coaching on the EBP until fidelity is attained
